

Almir Sarajcic

Sarajevo, Bosnia and Herzegovina
almir.sarajcic@icloud.com

Overview

Full stack web developer with a preference to REST-style modeling of applications. Started learning programming with BASIC, C and C++, but became more interested in web development using PHP and JavaScript. Later discovered Ruby on Rails and started using it for all new ventures.

I enjoy working in teams and I prefer small companies. I have experience working remotely in a startup. I also work as a freelancer.

Experience

Backend Developer, Mukuru, Cape Town (remote) Oct 2016 - present
Mukuru is an African fintech startup founded in 2006. It helps with money transfer around Africa.

I'm part of a remote team from Sarajevo. We are working on implementing new features in PHP application using DDD and TDD, but also improving old code.

Full Stack Developer, Klika, Sarajevo Apr 2015 - Oct 2016
Klika is a software development company offering outsourcing and consulting services. I was working on client projects using Ruby on Rails and JavaScript.

Full Stack Developer, Social Eddy, McAllen, Texas (remote) Sep 2012 - Nov 2013
Social Eddy was a content marketing tool that helped users manage social accounts and curate content. I was hired into remote team to help finishing the application created with PHP, MySQL and Javascript.

- Communication with 3rd-party APIs
- Analytics
- SQL queries optimization
